Lisp (historically LISP) is a family of computer programming languages with a long history and a distinctive, fully parenthesized prefix notation. Originally specified in 1958, Lisp is the second-oldest high-level programming language in widespread use today. Only Fortran is older, by one year. Lisp has changed since its early days, and many dialects have existed over its history.

Pascal is an imperative and procedural programming language, which Niklaus Wirth designed in 1968 and published in 1970, as a small, efficient language intended to encourage good programming practices using structured programming and data structuring. It is named in honor of the French mathematician, philosopher and physicist Blaise Pascal. Pascal was developed on the pattern of the ALGOL ...

Assembleertaal of assembly is een low-level programmeertaal die nauwelijks meer dan een symbolische weergave van machinetaal is. Elke regel in de assembleertaal komt overeen met één enkele instructie, zij het dat de vertalende assembler nog wel ondersteuning biedt in de vorm van symbolische namen (labels) voor geheugenlocaties die gebruikt worden voor constanten of variabelen, en voor ...
