An organization's financial plans should include budgets for both operating and for capital as discussed in previous section, on Budgeting. The budgeting process and good practices were also discussed in the previous sections, The Budgeting Process, and Budgeting Practices. In this section we will discuss the terms and concepts involved in creating the annual operating budget.

The abacus (plural abaci or abacuses), also called a counting frame, is a calculating tool that was in use in Europe, China and Russia, centuries before the adoption of the written Hindu-Arabic numeral system. The exact origin of the abacus is still unknown. Today, abacuses are often constructed as a bamboo frame with beads sliding on wires, but originally they were beans or stones moved in ...

The energy efficiency in transport is the useful travelled distance, of passengers, goods or any type of load; divided by the total energy put into the transport propulsion means. The energy input might be rendered in several different types depending on the type of propulsion, and normally such energy is presented in liquid fuels, electrical energy or food-energy.
